DESCRIPTION

This car wash facility, currently lender-owned, features eight bays and eight vacuum stations, with all the necessary car wash equipment already in place. There's significant potential to enhance operations, particularly by transitioning from the existing coin-operated payment system to a more modern, convenient credit card payment solution. By implementing credit card payments, customers would enjoy a more seamless experience, which could increase traffic and overall revenue. This upgrade would also position the car wash as more user-friendly and accessible to a broader audience.
